81388	Church Of St James Edlaston Lane Edlaston Derbyshire	<p>Parish church. Early C14, 1682, c1870 and 1900 by E. A. Minty of London brother of the incumbent at the time. Coursed rubble and squared sandstone, and sandstone ashlar. Plain tile and lead roofs. Plain parapet to nave. West Vestry and bell turret, nave with south porch, and chancel. Irregular South elevation of nave. Gabled South porch with plain chamfered arch. To the right high up, a 2-light window with trefoil-headed lights under a flat head. To the right again a 3-light window under a flat head, with C19 cusped ogee lights. Three buttresses with many set offs. Beneath the parapet is a circular sun dial. The chancel was probably rebuilt in 1682, the date is carved on a stone in the east wall outside. It has a chamfered plinth, no window openings to the north and a 2-light flat headed window to the south with cusped ogee lights, the upper parts of the tracery filled in. 3-light east window of c1870, with reticulated tracery. The lower part of the window has an unusual stepped arrangement of small pierced trefoils and quatrefoils in roundels, containing coloured glass forming a reredos within. The nave has an irregular north elevation with buttresses of varying sizes, a blocked C19 flat headed doorway and a 2-light window with cusped ogee lights under a flat head. West vestry and bellcote of 1900. Lean-to vestry with coped walls and a 2-light west window with cusped pointed-arched lights with almost straight shanks. Tall thin ashlar bellcote with diamond plan angle piers, a small pitched plain tile roof and lead spike. Twin arched bell-openings. Chamfered round-arched south doorway. Plain interior with rendered walls. Double chamfered tower arch. Nave roof with cambered tie beams. In</p>	IISTAR	13/09/1967
